**Správa o činnosti organizácie SAV
za rok 2022**

Bratislava
január 2023

Obsah

1. Základné údaje o organizácii
2. Vedecká činnosť
3. Doktorandské štúdium, iná pedagogická činnosť a budovanie ľudských zdrojov pre vedu a techniku
4. Medzinárodná vedecká spolupráca
5. Koncepcia dlhodobého rozvoja organizácie
6. Spolupráca s VŠ a inými subjektmi v oblasti vedy a techniky
7. Aplikácia výsledkov výskumu v spoločenskej a hospodárskej praxi
8. Aktivity pre Národnú radu SR, vládu SR, ústredné orgány štátnej správy SR a iné org.
9. Vedecko-organizačné a popularizačné aktivity
10. Činnosť knižnično-informačného pracoviska
11. Aktivity v orgánoch SAV
12. Hospodárenie organizácie
13. Nadácie a fondy pri organizácii SAV
14. Informácie o aktivitách súvisiacich s uplatňovaním princípov rodovej rovnosti
15. Iné významné činnosti organizácie SAV
16. Vyznamenania, ocenenia a ceny udelené organizácii a pracovníkom organizácie SAV
17. Poskytovanie informácií v súlade so zákonom o slobodnom prístupe k informáciám
18. Problémy a podnety pre činnosť SAV

PRÍLOHY

2.2.3. Zámery na čerpanie Európskych štrukturálnych a investičných fondov v ďalších výzvach

2.3. Výber najvýznamnejších výsledkov vedeckej práce organizácie v roku 2022

Služi aj na výber výsledkov do výročnej správy SAV. Každý výsledok má byť charakterizovaný stručným, všeobecne zrozumiteľným popisom – maximálne 1000 znakov + 1 obrázok; bibliografický údaj uvádzajte rovnako ako v zozname publikačnej činnosti, vrátane IF. Nadpis by mal vystihnúť prínos a význam výsledku – podľa možnosti by nemal byť zredukovaný na názov/nadpis publikačného výstupu.

2.3.1. Výsledky na báze základného výskumu

(1) Termická stabilita fáz vzniknutých hydrotermálnym ošetrením cementu triedy G s rôznymi puzolánovými a latentne hydraulickými prísadami pri vysokých tlakoch.

Riešitelia: E. Kuzielová, M. Slaný, M. Žemlička, M. Palou.

Mnohozložkové cementové kaše pripravené z cementu triedy G, kremičitého úletu (SF), metakaolínu (MK) a jemne mletej vysokopecnej trosky (BFS) boli podrobené ošetreniu v prostredí simulujúcom hydrotermálne podmienky pri súčasnom pôsobení zvýšeného tlaku 180 bar a teploty 150 °C. Štúdiá vytvorených fáz a ich vzťah s pevnosťou v tlaku bola vykonaná s pomocou FTIR, TGA a RTG. Štruktúra a množstvo vzniknutých fáz závisí od použitej kombinácie doplnkových cementových materiálov. Ich rozdielna reaktivita v čase hrá kľúčovú úlohu v tvorbe želaných fáz. Najväčšie množstvo žiadaných kremičitanových a hlinito-kremičitanových fáz vzniklo v zložení s rovnakým množstvom SF a MK. To sa odzrkadlilo aj v pevnosti v tlaku (48 MPa). Detegovanými fázami boli *tobermorit*, *hibschit* a *katoit*. Naopak, vo vzorkách s BFS bolo zaznamenané nižšie množstvo vytvorených hydratačných fáz, ktoré zároveň podliehali neželaným teplotným transformáciám, kde najviac zastúpenou fázou bol neželený α -C₂SH. To malo vplyv na pokles pevnosti v tlaku (~ 10 MPa).

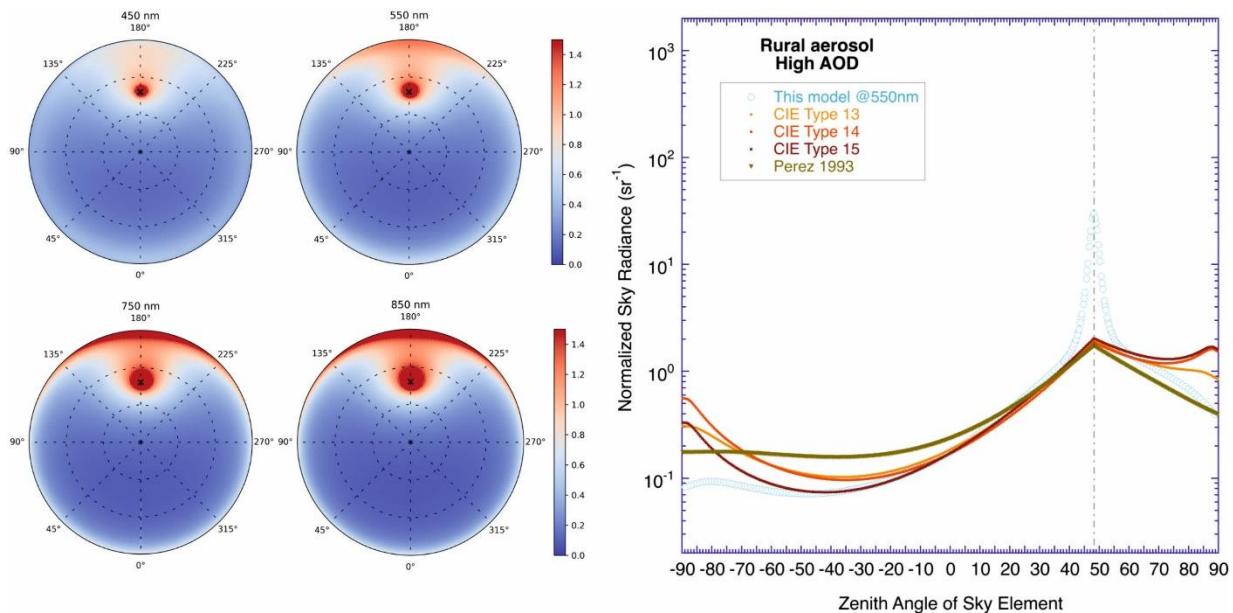

Obr. Záznamy röntgenovej difrakčnej analýzy študovaných cementových kompozitov.

Thermal stability of the phases developed at high-pressure hydrothermal curing of class G cement with different pozzolanic and latent hydraulic additives. In *Journal of Thermal Analysis and Calorimetry*, 2022, vol. 147, no. 18, p. 9891-9902, 4.755 – IF, Q1. Dostupné na: <https://doi.org/10.1007/s10973-022-11254-2>. Typ: ADCA

(2) Globálny model spektrálnej žiary oblohy

Riešitelia: (SAV: M. Kocifaj), (USA: Ch. Gueymard)

Efektívne využitie fotovoltaiky (PV) v rôznych podmienkach vyžaduje modely zohľadňujúce aj difúziu zložku žiarenia. Mnohé zo súčasných výkonných modelov nie sú dostatočne adaptibilné pre globálne využitie, pretože nereagujú na silnú premenlivosť zloženia aerosólu v rôznych lokalitách a neposkytujú relevantné predpovede pre širokú oblasť spektra. Náš model je univerzálnejší a umožňuje hodnotenie PV staníc kdekoľvek na svete. Využitím kombinácie troch funkcií rozptylu dosahuje vysokú presnosť pri výpočte žiarenia v blízkom okolí Slnka (výhodné pre slnečné koncentrátoary) ako aj na horizonte oproti pozícii Slnka. Analytické riešenie je navyše prelomové aj pre súčasné modely svetelného znečistenia, pretože: a) funguje dobre pre malé uhly rozptylu, t.j. pre svetelné emisie deponované na veľkú vzdialenosť od mesta, b) kombinuje rôzne typy aerosólov, t.j. umožňuje klasifikáciu na základe prevládajúceho typu znečistenia v regióne, c) poskytuje extrémne rýchle modelovanie pre ľubovoľné spektrálne pásmo.

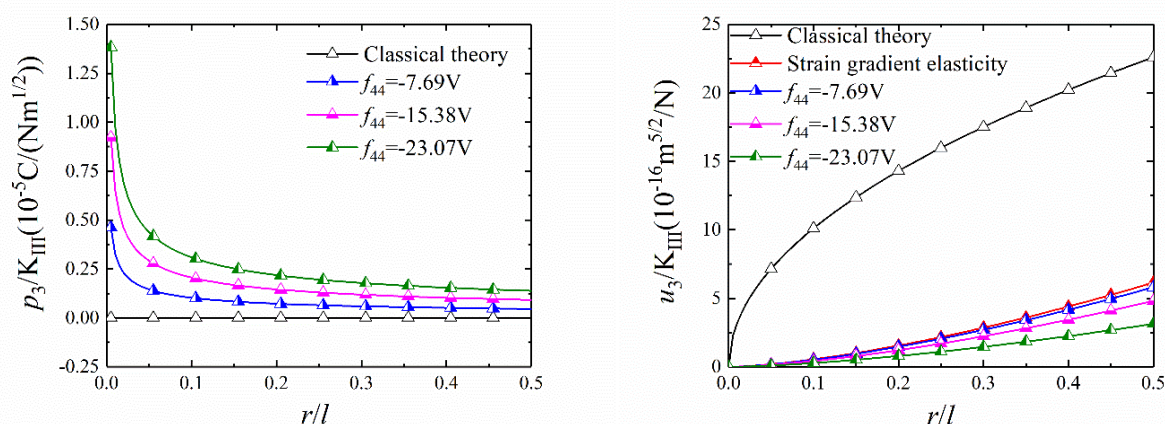

Vľavo: normalizovaná žiara oblohy pre štyri vlnové dĺžky a zenitový uhol Slnka 48°. Vpravo: v porovnaní s doterajšími CIE modelmi CIE a Perezovým modelom, je nové riešenie oveľa presnejšie pre okoloslnecnú zónu a pre spätný rozptyl.

GUEYMARD, CH. A. - KOCIFAJ, Miroslav. Clear-sky spectral radiance modeling under variable aerosol conditions. In *Renewable and Sustainable Energy Reviews*, 2022, vol. 168, art. no. 112901. (2021: 16.799 - IF, Q1 - JCR, 3.678 - SJR, Q1 - SJR). ISSN 1364-0321. Dostupné na: <https://doi.org/10.1016/j.rser.2022.112901>.
Typ: ADCA

(3) Analytické riešenia úloh s trhlinami pre mode III pri flexoelektrickom efekte. (APVV SK-18-0004).**Riešitelia:** J. Sládek, V. Sládek

Koncentrácie napätí v okolí koreňa trhliny znásobujú flexoelektrický efekt v dielektrikách, čo otvára nové možnosti jeho využitia v materiálových vedách. V odvodených formuláciách je zahrnutá priama aj konverzná flexoelektricitá a ich aplikovaním pre trhlinu v nekonečnej rovine sme zostrojili asymptotické distribúcie pre polia premiestnení, elektrickej polarizácie, gradientov deformácií a skutočných fyzikálnych napätí v analytickom tvare. Pre analýzu vplyvu flexoeffectu na porušenie konštrukcií sme odvodili dráhovo nezávislý J-integrál. Získané výsledky (obr.) ukázali, že s narastajúcou hodnotou koeficientu flexoelektricity narastá polarizácia a klesajú hodnoty normálových premiestnení na povrchu trhliny. Flexoelektrický efekt vedie k redukcii hodnôt J-integrálu, čo znižuje nebezpečenstvo porušenia konštrukcie s trhlinami. Tento fenomén je významný predovšetkým v mikro-konštrukciách, kde je flexoelektrický efekt výraznejší v dôsledku vyšších hodnôt gradientov deformácií.

2.3.2. Výsledky aplikačného typu

(1) Sanácia vody a pôdy kontaminovanej Cd a Cu pomocou nových nanomateriálov získaných zo spracovania cukrovej repy a pevných odpadov z ílovo-hlinených tehál

Riešiteľ: M. Slaný

Odberateľ: University of Wuppertal, School of Architecture and Civil Engineering, Institute of Foundation Engineering, Water, and Waste-Management, Laboratory of Soil, and Groundwater-Management, Pauluskirchstraße 7, 42285 Wuppertal, Germany

V tejto práci boli vyrobené a plne charakterizované dva nové ekologické nanomateriály zo spracovania cukrovej repy (SBR) a zvyškov z ílových tehál (BFR). Bola zhodnotená ich schopnosť sorpcie Cd a Cu vo vode a zníženie dostupnosti ťažkých kovov v kontaminovanej pôde. SBR odstránil až 99% Cu a 91% Cd vo vode a vykazoval výrazne rýchlejšiu a vyššiu sorpčnú kapacitu v porovnaní s BFR, dokonca aj pri kyslom pH. Dostupnosť pôdneho kovu bola výrazne znížená SBR (až o 57% pre Cu a 86 % pre Cd) a BFR (až 36 % pre Cu a 68 % pre Cd) v porovnaní s neupravenou pôdou. Vyššiu účinnosť odstraňovania SBR oproti BFR možno pripísať jeho vyššej zásaditosti (pH = 12,5), obsahu uhličitanov (82 %) a veľkosti špecifického merného povrchu. Hlavnými reaktívnymi skupinami, ktoré mohli hrať dôležitú úlohu pri sorpcii Cd a Cu oboma materiálmi a boli identifikované pomocou FTIR spektroskopie boli hydroxyl-OH skupiny, Si-O, Al-O a Fe-O.

Dostupné na: <https://doi.org/10.1016/j.jhazmat.2021.128205>

(2) Vplyv ílových minerálov rôzneho typu a etanolu ako donoru vodíka na katalytickú akvatermolýzu ťažkého oleja

Riešitelia: M. Slaný, E. Kuzielová

Odebrateľ: State Key Laboratory of Petroleum Pollution Control, Xi'an Shiyou University, Xi'an, China

Tento výskum dokázal, že ílové minerály aj neílové minerály majú katalytický účinok na aquatermolýzu ropy. Sodný íl preukázal najlepší katalytický účinok vo všeobecnosti, zatiaľ čo sulfid železnatý vykazoval najlepší katalytický účinok spomedzi neílových minerálov. Metanol sa ukázal ako najvhodnejší donor na zvýšenie účinnosti pre zníženie viskozity. Za optimálnych podmienok katalytickej aquatermolýzy môže miera zníženia viskozity dosiahnuť až 87, 32% v porovnaní s pôvodným ťažkým olejom. Na štúdium zmien vyskytujúcich sa počas katalytickej akvatermolýzy ropy sa použili diferenciálna skenovacia kalorimetria (DSC), infračervená spektrometria (FTIR), termogravimetrická analýza (TGA), elementárna analýza a plynová chromatografia-hmotnostná spektrometria (GC-MS). Okrem toho bolo vybraných niekoľko rôznych modelových zlúčenín (1-oktén, tiofén, fenol, pyridín, chinolín, benzotiofén a nonylfenol) na simuláciu chemických zmien zložiek ropy a na návrh reakčných mechanizmov.

2.3.3. Výsledky na báze medzinárodnej spolupráce

(1) Lokálne gradientna teória pre dielektrika s neklasickým zákonom vedenia tepla: termopolarizačný a flexoelektrický efekt. (SK-UA-21-0010, SK-CN-RD-18-0005).

Riešitelia: Institute of Construction and Architecture SAS: Hrytsyna O., Hrytsyna M.; Pidstryhach Institute for Applied Problems of Mechanics and Mathematics, National Academy of Sciences of Ukraine: Tokovyy Y. V.

S využitím základných princípov nerovnovážnej termodynamiky, mechaniky kontinua a elektrodynamiky je navrhnutá nová neklasická teória termoelastických kryštálických dielektrík. Teória je založená na zovšeobecnení vzťahu medzi tepelnými a entropickými tokmi a berie do úvahy proces lokálneho posuvu hmotnosti, spôsobeného zmenami v materiálovej mikroštruktúre. Pre uvažované kontinuum sú formulované konštitutívne rovnice gradientného typu a zákon nelokálneho vedenia tepla (zovšeobecnený Fourierov zákon). Teória sa používa na štúdium odozvy elektrickej polarizácie izotropnej vrstvy na teplotný gradient; na skúmanie zviazaných polí v jednoducho podoprenom piezoelektrickom nano-nosníku zaťaženom distribuovanou silou; a na štúdium zviazaných polí v dutom valci zaťaženom mechanickým tlakom a elektrickým napätím. Analytické riešenia demonštrujú, že oproti klasickej teórii nová teória popisuje termopolarizačný efekt v izotropných materiáloch, veľkostný, priamy a inverzný flexoelektrický efekty.

2.3.4 Ostatné významné výsledky

Veľkostný efekt v piezo-elektrických polovodičových nano-konštrukciách.

Riešitelia: J. Sládek, V. Sládek, M. Repka

Ak sú rozmery polovodičovej piezoelektrickej konštrukcie redukované na nano rozmery, takzvaný veľkostný efekt vplyva na správanie sa konštrukcie. Kvôli matematickej zložitosti problému bola vyvinutá numerická metóda, takzvaná zmiešaná metóda konečných prvkov. Numerické príklady ukazujú, že odozva piezoelektrickej polovodičovej konštrukcie môže byť značne ovplyvnená počiatočnou elektrónovou hustotou a flexoelektrickým koeficientom. Vplyv veľkostného efektu, ktorý je typický pre veľmi malé konštrukcie bol demonštrovaný pre votknutý nosník zaťažený silou na konci nosníka, so vzrastajúcim flexoelektrickým koeficientom sa priehyb znižuje. Na druhej strane priehyb môže byť zväčšený väčšími hodnotami počiatočnej hustoty elektrónov.

Vplyv nesféricity atmosferického aerosólu na jas nočnej oblohy

Riešitelia: L. Kómar, S. Wallner, M. Kocifaj

Väčšina v súčasnosti používaných modelov prenosu žiarenia je založená na Mieho teórii pre sférické homogénne častice, avšak sférické tvary sú zriedkavé pre prírodné aj antropogénne aerosóly. Štúdiá sa zaoberá kvantifikovaním efektu nesféricity častíc pri modelovaní jasno nočnej oblohy. Na modelovanie používame T-maticový formalizmus rozptylu svetla na sféroidálnych časticách ľubovoľnej veľkosti, zloženia a orientácie vzhľadom na dopadajúce svetlo. Výsledky naznačujú, že vplyv tvaru častíc na jas nočnej oblohy môže byť až 70%, predovšetkým okolo zenitu, keďže kľúčovým sa stáva rozptyl svetla do uhlov cca. 90° - 120°. Dôsledkom toho môže byť systematické podhodnotenie alebo nadhodnotenie zenitného jasno pri modelovaní a následnom porovnávaní s meraniami pomocou SQM zariadení.

Kinetika a mechanizmy hydratačných reakcií G-Dyckerhoff cementu pomocou termických metód.

Riešitelia: M. Palou, E. Kuzielová, M. Žemlička, J. Podhorská, J. Čepčianska

Simultánny efekt teploty (25, 40, 50, 60, 80 °C) a materiálového zloženia kompozitných cementov na báze cementu G-Dyckerhoff s rôznymi úrovňami substitúcie vysokou troskovou pecou, metakaolínom a vápencom boli analyzované za účelom identifikácie hydratačných produktov a výpočtu aktivačnej energie rôznych reakcií pomocou vodivostného kalorimetra a termogravimetrickej metódy. Bolo pozorovaných viac konkrétnych javov charakterizujúcich rôzne hydratačné reakcie cementových kompozitov, ktorých intenzity a čas závisia od teplôt a zloženia materiálov. Zdanlivé aktivačné energie vypočítané z hydratačných píkov charakterizujúcich rôzne reakcie klesajú so substitúciou. Termogravimetrická analýza vzoriek po kalorimetrickom meraní ukazuje, že množstvo hydratačných produktov závisí od materiálového zloženia materiálu a teplôt hydratácie.

The influence of supplementary cementitious materials on the hydration of Dyckerhoff G-Oil cement. In *Journal of Thermal Analysis and Calorimetry*, 2022, vol. 147, no. 18, p. 9935-9948. (2021: 4.755 - IF, Q1 - JCR, 0.639 - SJR, Q2 - SJR). ISSN 1388-6150. Dostupné na: <https://doi.org/10.1007/s10973-022-11444-y>

2.4. Publikačná činnosť (zoznam je uvedený v prílohe C)

Tabuľka 2e Štatistika vybraných kategórií publikácií

PUBLIKAČNÁ A EDIČNÁ ČINNOSŤ	Počet v r. 2022/ doplňky z r. 2021
1. Vedecké monografie a monografické štúdie vydané v domácich vydavateľstvách (AAB, ABB)	0 / 0
2. Vedecké monografie a monografické štúdie vydané v zahraničných vydavateľstvách (AAA, ABA)	0 / 0
3. Odborné monografie, vysokoškolské učebnice a učebné texty vydané v domácich vydavateľstvách (BAB, ACB, CAB)	0 / 0
4. Odborné monografie a vysokoškolské učebnice a učebné texty vydané v zahraničných vydavateľstvách (BAA, ACA, CAA)	0 / 0
5. Kapitoly vo vedeckých monografiách vydaných v domácich vydavateľstvách (ABD)	0 / 0
6. Kapitoly vo vedeckých monografiách vydaných v zahraničných vydavateľstvách (ABC)	0 / 0
7. Kapitoly v odborných monografiách, vysokoškolských učebniciach a učebných textoch vydaných v domácich vydavateľstvách (BBB, ACD)	0 / 0
8. Kapitoly v odborných monografiách, vysokoškolských učebniciach a učebných textoch vydaných v zahraničných vydavateľstvách (BBA, ACC)	0 / 0
9. Vedecké práce registrované v Current Contents Connect (ADCA, ADCB, ADDA, ADDB)	37 / 0
10. Vedecké práce registrované vo Web of Science Core Collection alebo Scopus (ADMA, ADMB, ADNA, ADNB)	5 / 1
11. Vedecké práce v ostatných domácich časopisoch (ADFA, ADFB)	0 / 0
12. Vedecké práce v ostatných zahraničných časopisoch (ADEA, ADEB)	0 / 0
13. Vedecké práce v domácich recenzovaných zborníkoch (AEDA)	0 / 0
14. Vedecké práce v zahraničných recenzovaných zborníkoch (AECA)	0 / 0
15. Publikované príspevky na domácich vedeckých konferenciách (AFB, AFD)	6 / 2
16. Publikované príspevky na zahraničných vedeckých konferenciách (AFA, AFC)	4 / 0
17. Vydané periodiká evidované v CCC, WoS Core Collection, SCOPUS	0
18. Ostatné vydané periodiká	0
19. Zostavovateľské práce knižného charakteru (FAI)	0 / 0
20. Preklady vedeckých a odborných textov (EAJ)	0 / 0
21. Heslá v odborných terminologických slovníkoch a encyklopédiách (BDA, BDB)	0 / 0
22. Recenzie v časopisoch a zborníkoch (EDI)	0 / 0

Evidujú sa len tie práce zamestnancov a doktorandov, v ktorých je uvedená afiliácia k organizácii

Tabuľka 2f Štatistika vedeckých prác podľa kvartilu vedeckého časopisu

Kvartil vedeckého časopisu	Q1	Q2	Q3	Q4	Spolu
Podľa IF z r. 2021 (zdroj JCR) <i>Počet článkov / doplnky</i>	27 / 0	7 / 0	4 / 0	0 / 0	38 / 0

Tabuľka 2g Ohlasy

OHLASY	Počet v r. 2021/ doplnky z r. 2020
Citácie vo WOS (1.1, 2.1)	934 / 6
Citácie v SCOPUS (1.2, 2.2)	99 / 6
Citácie v iných citačných indexoch a databázach (9, 10, 3.2, 4.2)	0 / 0
Citácie v publikáciách neregistrovaných v citačných indexoch (3, 4, 3.1, 4.1)	0 / 0
Recenzie na práce autorov z organizácie (5, 6, 7, 8)	0 / 0

2.5. Aktívna účasť na vedeckých podujatiach

Tabuľka 2h Vedecké podujatia

Prednášky a vývesky na medzinárodných vedeckých podujatiach	38
Prednášky a vývesky na národných vedeckých podujatiach	4

2.6. Vyžiadané prednášky

2.6.1. Vyžiadané prednášky na medzinárodných vedeckých podujatiach

J. Sladek plenárnu prednášku na medzinárodnej konferencii ICSID 2022 Dubrovnik, September 2022: Crack analyses in nano-sized structures under a Joule heating

J. Sladek na Summer School-Fatigue and Fracture Modelling and Analysis, Dubrovnik, September 2022 som predniesol 3-hodinovú prednášku: Advanced continuum models for crack analyses in nano-sized structures

M. Kocifaj: The next ten years: LPTMM Challenges for Preserving the Night Sky. The conference on Light Pollution: Theory, Modelling and Measurements, June 21-24 2022, Santiago de Compostela, Galicia (Spain).

M. Kocifaj: Computing high-order scattering. The conference on *Light Pollution: Theory, Modelling and Measurements*, June 21-24 2022, Santiago de Compostela, Galicia (Spain).

M. Kocifaj, A. Kocifajová: Ground-based methods to characterize the lower atmosphere. *2nd International Conference on Environmental and Astronomical Light Pollution*, September 2-3 2022, Niepołomice, Poland.

M. T. Palou: Design of the self-compacting heavyweight concrete. Keynote speaker at 25th In ICBMPT 2021. 25 th International Conference of the Research Institute for Building Materials "Building Materials, Products and Technologies" September 29 - October 1, 2021, Telč, Czech Republic

M. T. Palou: Decarbonisation of the cement and construction industry through development of novel materials. 11TH INTERNATIONAL CONFERENCE OF THE AFRICAN MATERIALS RESEARCH SOCIETY, 12-15 December 2022, Venue: University Cheikh Anta Diop of Dakar

2.6.2. Vyžiadané prednášky na národných vedeckých podujatiach

2.6.3. Vyžiadané prednášky na významných vedeckých inštitúciách

J. Sladek predniesol prednášku na UFM AV ČR, December 2022: Crack analyses in nano-sized structures under a Joule heating

V. Sladek predniesol prednášku na UFM AV ČR, December 2022: Higher-grade theory of heat conduction in solids

M. Kocifaj: Atmospheric optics. Light Pollution: Meteorology and astronomy – How air pollution makes stars disappear. March 17 2022, Kuffner Observatory, Austria.

S. Darula - Svetlotechnika – FEKT VUT v Brne

2.7. Patentová a licenčná činnosť na Slovensku a v zahraničí v roku 2022

2.7.1. Vynálezy, na ktoré bol v roku 2022 udelený patent

a) na Slovensku

b) v zahraničí

2.7.2. Vynálezy prihlásené v roku 2022

a) na Slovensku

b) v iných krajinách ako prioritná prihláška

c) PCT

d) EP

e) v iných krajinách v rámci tzv. národnej fázy po PCT, resp. po validácii EP

2.7.3. Úžitkové vzory na Slovensku

a) prihlásené v roku 2022

b) udelené v roku 2022

2.7.4. Realizované vynálezy

a) predané patenty resp. prihlášky vynálezov (v prípade úplnej zmeny majiteľa patentu)

b) predané licencie (v prípade že majiteľom ostáva organizácia SAV)

Finančný prínos pre organizáciu SAV v roku 2022 a súčet za predošlé roky sa neuvádzajú, ak je zverejnenie v rozpore so zmluvou súvisiacou s realizáciou patentu.

2.8. Účasť expertov na hodnotení národných projektov (APVV, VEGA a iných)

Tabuľka 2i Experti hodnotiaci národné projekty

Meno pracovníka	Typ programu/projektu/výzvy	Počet hodnotených projektov
Čekon Miroslav	KEGA	2
Matiašovský Peter	VEGA	1

2.9. Účasť na spracovaní hesiel do encyklopédie Beliana

Počet autorov hesiel: 0

2.10. Recenzovanie knižných publikácií a príspevkov vo vedeckých časopisoch

2.11. Iné informácie k vedeckej činnosti.

3. Doktorandské štúdium, iná pedagogická činnosť a budovanie ľudských zdrojov pre vedu a techniku

3.1. Údaje o doktorandskom štúdiu

Tabuľka 3a Počet doktorandov v roku 2022

Forma	Počet k 31.12.2022				Počet doktorandov po doktorandskej skúške		Počet ukončených doktorantúr v r. 2022						
	celkový počet		z toho novoprijatí				Ukončenie z dôvodov						
	M	Ž	M	Ž			ukončenie úspešnou obhajobou		predčasné ukončenie		neúspešné ukončenie		
	M	Ž	M	Ž	M	Ž	M	Ž	M	Ž	M	Ž	
Denná zo zdrojov SAV	1	3	1	0	0	2	0	1	0	0	0	0	0
Denná z iných zdrojov	0	0	0	0	0	0	0	0	0	0	0	0	0
Externá	0	0	0	0	0	0	0	0	0	0	0	0	0
Spolu	0	3	0	0	0	1	0	0	0	0	0	0	0
Z toho zahraničných	0	0	0	0	0	0	0	0	0	0	0	0	0
Súhrn	4		1		2		1		0		0		

Uvádzajte len doktorandov organizácie ako externej vzdelávacej inštitúcie.

Riadok „Spolu“ je súčtom troch riadkov nad ním. Každá bunka v riadku „Súhrn“ vyjadruje celkový počet doktorandov (mužov a žien spolu), čiže je súčtom príslušných dvoch buniek z riadku „Spolu“. V stĺpci „Počet doktorandov po doktorandskej skúške“ sa uvádza počet doktorandov, ktorí počas roku 2022 boli aspoň 1 deň doktorandami po doktorandskej skúške. Sú číselne zahrnutí aj v predchádzajúcich stĺpcoch.

Pod predčasným ukončením rozumieme ukončenie bez obhajoby dizertačnej práce pričom doktorand neabsolvoval celú štandardnú dĺžku štúdia. Pod neúspešným ukončením rozumieme ukončenie bez úspešnej obhajoby dizertačnej práce, pričom študent absolvoval celú štandardnú dĺžku štúdia.

3.2. Zmena formy doktorandského štúdia

Tabuľka 3b Počty preradení z dennej formy na externú a z externej na dennú

Pôvodná forma	Denná z prostriedkov SAV	Denná z prostriedkov SAV	Denná z iných zdrojov	Denná z iných zdrojov	Externá	Externá
Nová forma	Denná z iných zdrojov	Externá	Denná z prostriedkov SAV	Externá	Denná z prostriedkov SAV	Denná z iných zdrojov
Počet	0	0	0	0	0	0

3.3. Zoznam doktorandov, ktorí ukončili doktorandské štúdium úspešnou obhajobou

Tabuľka 3c Menný zoznam ukončených doktorandov v roku 2022 úspešnou obhajobou

Meno doktoranda	Forma DŠ	Mesiac, rok nástupu na DŠ	Mesiac, rok obhajoby	Číslo a názov študijného odboru	Meno a organizácia školiteľa	Fakulta udeľujúca vedeckú hodnotu
Ing. Janette Podhorská, PhD.	denná	9. 2017	8. 2022	5.2.8 stavebníctvo	prof. Dr. Ing. Martin-T. Palou, ÚSTARCH SAV, v. v. i.	Stavebná fakulta STU v Bratislave

3.4. Zoznam doktorandov, ktorí ukončili doktorandské štúdium úspešnou obhajobou v nadštandardnej dĺžke štúdia

Tabuľka 3d Menný zoznam ukončených doktorandov v roku 2022 úspešnou obhajobou v nadštandardnej dĺžke štúdia

Meno doktoranda	Forma DŠ	Mesiac, rok nástupu na DŠ	Mesiac, rok obhajoby	Číslo a názov študijného odboru	Meno a organizácia školiteľa	Fakulta udeľujúca vedeckú hodnotu
-----------------	----------	---------------------------	----------------------	---------------------------------	------------------------------	-----------------------------------

3.5. Uplatnenie absolventov doktorandského štúdia

Tabuľka 3e Prehľad uplatnenia absolventov doktorandského štúdia

Počet absolventov PhD. štúdia v roku 2022 (obhajoba leto 2022)	z toho koľkí sa zamestnali vo výskume (SAV, univerzity, rezortné výskumné ústavy)	z toho koľkí sa zamestnali v praxi mimo výskum, kde využívajú svoju kvalifikáciu	z toho koľkí sa zamestnali v praxi, kde nevyužívajú svoju kvalifikáciu	z toho koľkí boli nejaký čas nezamestnaní
0	0	0	0	0

Zoznam interných a externých doktorandov je uvedený v prílohe A.

3.6. Medzinárodné doktorandské štúdium

Tabuľka 3f Počet študentov v medzinárodných programoch doktorandského štúdia

Cotutelle	Co-direction	Iné	Zahranční doktorandi štátne občianstvo/počet
0	0	0	

Zahranční doktorandi sú doktorandi v dennej alebo externej forme štúdia, ktorí sú občanmi iných krajín. Doktorandi školení v rámci Cotutelle alebo Co-direction sa do posledného stĺpca nezapočítavajú.

3.7. Zoznam študijných odborov, na ktoré má ústav uzatvorenú rámcovú dohodu, s uvedením VŠ

Tabuľka 3g Zoznam študijných odborov, na ktoré má ústav uzatvorenú rámcovú dohodu, s uvedením univerzity/vysokej školy a fakulty, kde sa doktorandský študijný program uskutočňuje

Názov študijného odboru (ŠO)	Číslo ŠO	Názov doktorandského študijného programu	Doktorandské štúdium uskutočňované na (univerzita/vysoká škola a fakulta)
Chemické inžinierstvo a technológie	2820	Anorganická technológia a materiály	Fakulta chemickej a potravinárskej technológie STU
Stavebníctvo	3659	Stavebníctvo	Stavebná fakulta STU
Strojárstvo	2381	Aplikovaná mechanika	Strojárska fakulta STU

Názov a číslo študijného odboru vyplňte/vyberte podľa aktuálne platného zoznamu študijných odborov <https://www.portalvs.sk/sk/studijne-odbory?from=menu1>. Názov doktorandského študijného programu v stĺpci 3 je potrebné vložiť ako voľný text.

Do 31. 8. 2023 študujú študenti doktorandského štúdia zaradení do študijných programov podľa zoznamu MŠVVaŠ, platného do 1. 9. 2019. Pre týchto študentov je potrebné napísať názov programu ako voľný text do stĺpca 3 a nevyplňovať stĺpce 1 a 2.

Tabuľka 3h Účasť na pedagogickom procese

Menný prehľad pracovníkov, ktorí boli menovaní do odborových komisií pre doktorandské štúdium	Menný prehľad pracovníkov, ktorí pôsobili ako členovia vedeckých rád univerzít, správnych rád univerzít a fakúlt	Menný prehľad pracovníkov, ktorí získali vyššiu vedeckú, pedagogickú hodnotu alebo vyšší kvalifikačný stupeň
doc. Ing. Miroslav Čekon, PhD. (stavebníctvo)	doc. Ing. Stanislav Darula, CSc. (Stavebná fakulta TUKE)	doc. Ing. Miroslav Čekon, PhD. (IIa)
doc. Ing. Stanislav Darula, CSc. (stavebníctvo)	Ing. Peter Matiašovský, CSc. (Slovenská technická univerzita v Bratislave)	Mgr. Jaromír Petržala, PhD. (IIa)
Mgr. Miroslav Kocifaj, DrSc. (meteorológia a klimatológia)	Ing. Peter Matiašovský, CSc. (Stavebná fakulta STU)	Mgr. Miroslav Kocifaj, DrSc. (DrSc., Fakulta matematiky, fyziky a informatiky UK)
Ing. Peter Matiašovský, CSc. (stavebníctvo)	Mgr. Hector Antonio Solano Lamphar, PhD. (UNAM, Mexico City, Mexico)	
Prof.Dr.Ing. Martin-Tchingnabé Palou		

(anorganická technológia a materiály)

4.3. Účast' expertov na hodnotení medzinárodných projektov (EÚ RP, ESF a iných)

Tabuľka 4b Experti hodnotiaci medzinárodné projekty

Meno pracovníka	Typ programu/projektu/výzvy	Počet hodnotených projektov
Solano Lamphar Hector Antonio	CONACYT	2

4.4. Najvýznamnejšie prínosy MVTS ústavu vyplývajúce z mobility a riešenia medzinárodných projektov a iné informácie k medzinárodnej vedeckej spolupráci

Výsledky Dr. H. A. Solano-Lamphar získané v rámci SAIA štipendia odhalili niektoré neočakávané dôsledky zvýšených úrovní svetelného znečistenia na populáciu, predovšetkým v urbanizovaných oblastiach. Zistené dopady svetelného znečistenia na kvalitu života v husto obývaných oblastiach vyžadujú hľadanie technologických a architektonických riešení na zníženie priameho aj difúzneho svetla v noci. SAIA projekt Dr. Solano-Lamphara bol mimoriadne úspešný a viedol k publikovaniu niekoľkých vedeckých prác v karentovaných časopisoch.

Súčasťou úspešnej práce Dr. Lamphara bol aj pobyt Joshua Iván Muñoz Salazara z University of Mexico (UNAM) na ústave v období od 1. do 31. júla 2022, ktorý bol zameraný na problematiku lepšieho využívania energetických zdrojov na osvetlenie miest v nočných hodinách.

Prehľad údajov o medzinárodnej mobilite pracovníkov organizácie je uvedený v Prílohe E.

Prehľad a údaje o medzinárodných projektoch sú uvedené v kapitole 2 a Prílohe B.

5. Koncepcia dlhodobého rozvoja organizácie

5.1. Odporúčania z posledného pravidelného hodnotenia organizácií SAV (akreditácie)

Komisia medzinárodného panelu nás zaradila do kategórie B/C s nasledujúcim vysvetlením:

1. Väčšina medzinárodného uznania je spojená s aktivitami prof. Jána Sládeka. Na pracovisku existuje niekoľko vedcov, ktorí sú jasne viditeľní na úrovni EÚ; avšak mnohí stále nie sú viditeľní v medzinárodnom prostredí. Je potrebné vynaložiť viac úsilia pri vytváraní podmienok pre mladú generáciu, aby rástla a dosahovala vyššiu úroveň.
2. Panel dôrazne odporúča hľadať partnerov pre spoluprácu v podobných a synergických vedeckých odboroch medzi ostatnými akademickými ústavmi, s cieľom nájsť kľúčových partnerov a s nimi sa zamerať na významnejšie a ambicióznejšie výstupy.
3. Nová kancelária pre transfer technológií SAV by mala v budúcnosti aktívne využívaná ako prostriedok pre dosahovanie vyšších výnosov.
4. Ústav by mal mať oveľa lepšie štruktúrovaný vzťah s medzinárodným poradným výborom (rodové vyváženie popredných odborníkov v danej oblasti) a mať nástroj na implementáciu jeho návrhov a rád.
5. Získavanie (pritahovanie) doktorandov a postdoktorandov zo zahraničia v rámci európskych programov, ako aj v rámci štipendijných fondov pridelených vládou SR (SAIA), medzivládne dohody si vyžadujú ambicióznosť a ciele stratégie.
6. Ústav sa musí viac zapájať do programov EÚ, čo si však vyžaduje aj aktívnu pomoc zo strany SAV pri poskytovaní náležitej podpory pri príprave návrhov, budovaní konzorcia, príprave grantov a písaní návrhov projektov.
7. Rodová rovnosť v rámci Ústavu si tiež vyžaduje silnú a nepretržitú pozornosť.

5.2. Hlavné body Akčného plánu organizácie a stav ich plnenia

Ústav sa od 1. 1. 2022 stal „verejnou výskumnou inštitúciou“ v rámci transformácie Slovenskej akadémie vied. V nasledujúcich bodoch sú zhrnuté opatrenia vyplývajúce z Akčného plánu ktoré priamo reagujú na odporúčania medzinárodného panelu z poslednej akreditácie, ktorý konštatoval „Ústav urobil počas tohto posledného kontrolného obdobia veľmi podstatný skok vpred (pozri všetky konkrétne pripomienky vyššie). Porota k tomu Ústav blahoželá.“

1. *Väčšina medzinárodného uznania je spojená s aktivitami prof. Jána Sládeka. Na pracovisku existuje niekoľko vedcov, ktorí sú jasne viditeľní na úrovni EÚ; avšak mnohí stále nie sú viditeľní v medzinárodnom prostredí. Je potrebné vynaložiť viac úsilia pri vytváraní podmienok pre mladú generáciu, aby rástla a dosahovala vyššiu úroveň.*

Sme hrdí, že medzinárodný hodnotiaci panel ocenil postavenie prof. Jána Sládeka a jeho dlhoročné aktivity na národnej i medzinárodnej úrovni. Toto tvrdenie nemusí vychádzať len z prezentácie či materiálov Akreditačného dotazníka pri posúdení ÚSTARCHE v. v. i., ale aj z iných dostupných zdrojov. Za povšimnutie však stojí aj vedecká činnosť prof. Vladimíra Sládka, ktorý má rovnaké scientometrické parametre ako prof. Ján Sládek. Okrem týchto dvoch mimoriadnych vedeckých pracovníkov má náš ústav aj tretiu vedeckú osobnosť s vynikajúcim rastúcim vedeckým kreditom doma i v zahraničí. Mgr. Miroslav Kocifaj, DrSc. v poslednom období dosahuje vynikajúce výsledky

s publikáciami v renomovaných časopisoch indexovaných v Nature. Má národné, európske a medzinárodné patenty a niekoľko ocenení. Títo traja vedeckí pracovníci tvoria piliere nášho ústavu.

Pracovníci Oddelenia materiálov a konštrukcií majú tiež aktivity európskeho a medzinárodného charakteru.

Prof. Ján Sládek, DrSc., prof. Vladimír Sládek, DrSc., Mgr. Miroslav Kocifaj, DrSc. a prof. Dr. Ing. Martin T. Palou sa intenzívne venujú mladým vedeckým pracovníkom, nielen ich zapojením do riešenia projektov, ale najmä vytváraním materiálnych a infraštruktúrnych a finančných podmienok pre ich samostatný a cieľavedomý rast. Ich scientometrické charakteristiky z roka na rok rastú. Ústav už dnes neformálne spolupracuje s mnohými poprednými vedeckými pracoviskami, dôkazom čoho sú mnohé spoločné publikácie v popredných vedeckých časopisoch. V tomto trende budeme pokračovať a zapájať aj viaceré kolektívy ústavu.

- 2. Panel dôrazne odporúča hľadať partnerov pre spoluprácu v podobných a synergických vedeckých odboroch medzi ostatnými akademickými ústavmi, s cieľom nájsť kľúčových partnerov a s nimi sa zamerať na významnejšie a ambicióznejšie výstupy.*

Ústav stavebníctva a architektúry má v tomto prípade jasnú víziu a má záujem viesť rokovania s ďalšími ústavmi podobného zamerania o vytvorení väčšieho integrovaného ústavu technických vied.

Jeho prioritou je efektívnejšie využívanie laboratórií v rámci vedeckých projektov. Naše špecializované prístrojové vybavenie je prístupné partnerským organizáciám SAV a univerzitám, ako aj pre využitie v praxi.

VR ÚSTARCh už má návrh názvu takéhoto ústavu, ktorý by zahŕňal ďalšie ústavy:

Ústav základného technického výskumu – Institute of Fundamental Technological Research.

- 3. Nová kancelária pre transfer technológií SAV by mala v budúcnosti aktívne využívať ako prostriedok pre dosahovanie vyšších výnosov.*

Kancelária transferu technológií SAV je novým orgánom s jasným programom. Musí však oslovovať ústavy a firmy, organizovať Workshopy a hľadať prieniky medzi vedeckými ústavmi SAV a aplikačnou sférou, vytvárať podmienky pre komercializáciu vedeckých výsledkov.

ÚSTARCh SAV, v. v. i., má eminentný záujem zapájať sa do aktivít nad rámec základného výskumu, poskytovať svoje personálne možnosti, priestorové a prístrojové infraštruktúry ústavom a firmám doma či v zahraničí na spoločné projekty.

- 4. Ústav by mal mať oveľa lepšie štruktúrovaný vzťah s medzinárodným poradným výborom (rodové vyváženie popredných odborníkov v danej oblasti) a mať nástroj na implementáciu jeho návrhov a rád.*

Zloženie medzinárodného poradného panelu

Dr. Zoltán Kolláth, Ass. prof., Eotvos Loránd University, Szombathely, Hungary

Dr. Robert Černý, prof., České vysoké učení technické v Praze, Czech Republic

Dr. Arnon Chaipanich, Ass. prof., Chiang Mai University, Thailand

Konzultácie s medzinárodným poradným výborom prebiehajú pravidelne, na základe odporúčania chce vedenie ústavu a VR ÚSTARChu v roku 2023 obnoviť zloženie doplnením tak, aby zodpovedalo koncepciám Ústavu o rodovej rovnosti.

5. *Medzivládne dohody vyžadujú ambicióznosť a cielené stratégie získavania doktorandov a postdoktorandov zo zahraničia v rámci európskych programov ako aj v rámci štipendijných fondov pridelených vládou SR (SAIA).*

Napriek tomu, že ÚSTARCHE je malý ústav - ako uvádza komisia, zreteľne vidno výraznú snahu o rast a internacionalizáciu ústavu. Napríklad v roku 2022 zo SASPRO recipientov ústav získal dvoch renomovaných vedcov, pričom v SAV sú väčšie ústavy, ktoré nezískali ani jedného. Ústav zaznamenáva veľký záujem vedeckých pracovníkov zo zahraničia (aj zo Západu) podieľať sa na jeho vedeckej činnosti. V roku 2023 sa očakáva zapojenie vedcov z Rakúska, Španielska a Iránu. Ústav má každoročne niekoľko zahraničných doktorandov a postdoktorandov v rámci medzivládnych dohôd alebo európskych programov a štipendijných fondov pridelených vládou SR (SAIA). Ústav prijal dvoch postdoktorandov v rámci programu SASPRO na 3 roky a príchod jedného postdoktoranda z Iránu sa očakáva v roku 2023. Najväčším problémom je vybavovanie víz na veľvyslanectve SR a dlhodobého pobytu na Slovensku. Práve v tejto oblasti apelujeme na pomoc Predsedníctva SAV. Problémom je tiež veľmi nízka finančná podpora zahraničných štážístov na pracovisku v porovnaní s možnosťami podpory v iných krajinách. Napríklad podpora od SAIA pre post doktoranda pod 1000 EUR za mesiac je odradzujúca a vyberie si inú krajinu. Ak nebudeme mať porovnateľnú podporu štážístov s podporou iných krajín, tak záujem spolupracovať so Slovenskom nebude rásť.

Pre skvalitnenie doktorandského štúdia bol analyzovaný súčasný stav a využitie súčasných možností. Rozšírili sa študijné programy a ponúklo sa 9 tém dizertačných prác. Pravidelné hodnotenie doktorandov prebieha na základe vnútorného systému kvality doktorandského štúdia v súlade so študijnými plánmi. V roku 2023 mal ústav 4 doktorandov. Jedna doktorandka úspešne obhájila doktorandskú prácu a získala cenu rektora ako aj ocenenie v súťaži „Študentská osobnosť Slovenska“ v kategórii „Stavebníctvo a architektúra“. Ústav má dvoch garantov doktorandského štúdia v troch programoch: 5.2.8 Stavebné inžinierstvo, 2820 Anorganická technológia a materiály a 2381 Aplikovaná mechanika. V nasledujúcom roku by mal pribudnúť ďalší garant, ktorý v roku 2022 obhájil a získal titul DrSc.

6. *Ústav sa musí viac zapájať do programov EÚ, čo si však vyžaduje aj aktívnu pomoc zo strany SAV pri poskytovaní náležitej podpory pri príprave návrhov, budovaní konzorcia, príprave grantov a písaní návrhov projektov.*

Ústav je pracoviskom základného výskumu so širokým spektrom medzinárodných spoluprác postavených práve na platforme vedeckého bádania.

Ústav stavebníctva a architektúry pravidelne podáva žiadosti o európske projekty v rámci výzvy. V roku 2023 boli podané 3 žiadosti a bol získaný jeden európsky projekt „INTERREG Rebuilt Circular and digital recovery of central Europe construction and building sektor“ v spolupráci so 14 inštitúciami z 8 európskych krajín.

Špičkoví vedeckí pracovníci sa pravidelne zúčastňujú na medzinárodných podujatiach a pôsobia v rôznych medzinárodných vedeckých výboroch:

- International Astronomical Union
- International Solar Energy Society (ISES)
- Optical Society of America (OSA)
- The Illuminating Engineering Society
- ICIC International Committee for Irradiated Concrete
- Central European Assoc. for Computational Mechanics
- International Society for Boundary Elements a pod.

V rámci internacionalizácie naši vedci úzko spolupracujú s mnohými zahraničnými pracoviskami

- Catedras CONACYT, Mexiko
- University Cégep de Sherbrooke, Kanada
- University of Vienna, Rakúsko
- US Army Research Lab, USA,
- Naresuan University, Thailand.
- School of Aerospace, Xi'an Jiaotong University, Xi'an, China
- Materials Sciences and Strength of Materials, University of Stuttgart, Germany
- Queen Mary College University of London, UK
- Imperial College University of London, UK
- Faculty of Mechanical Engineering, Brno University of Technology
- Hubei Key Laboratory of Engineering Structural Analysis and Safety Assessment, Wuhan, China
- Lomonosov University Moscow, Russia
- Department of Mechanical & Aerospace Engineering, Carleton University, Ottawa, Canada
- Department of Civil Engineering, University of Akron, Akron, USA
- Texas Tech University, Lubbock, USA
- National Academy of Sciences of Ukraine,
- Czech Technical University in Prague/Faculty of Civil Engineering
- Centre for Energy Research, Hungarian Academy of Sciences
- Institute of Fundamental Technological Research, Polish Academy of Sciences (IPPT PAN)
- Yonsei University, KR
- VUT Brno, ČR
- Výzkumný ústav stavebních hmot, Brno, ČR

Naši tvoriví pracovníci publikujú v spolupráci so zahraničnými vedcami práce v renomovaných zahraničných periodikách. Cieľom vedenia ústavu je preto plná podpora kvalitných publikačných výstupov s prihliadnutím na impakt faktor daného periodika a zaradenie do kvartilu s najvyšším hodnotením (Q1). Z 41 CC publikácií má ústav tento rok 28 v Q1 (68 %), 10 v Q2 (24 %), 2 v Q3 (5%) a 1 v Q4 (3%) podľa SJR z r. 2021. Teda viac ako 90% všetkých publikácií je v top časopisoch.

7. Rodová rovnosť v rámci inštitútu si tiež vyžaduje silnú a nepretržitú pozornosť.

Stratégia rodovej rovnosti na Ústave stavebníctva a architektúry predstavuje súbor cieľov a opatrení, pri ktorých majú ženy a muži, vedkyne a vedci v celej svojej rozmanitosti slobodu bádania, rovnaké príležitosti na úspech a môžu sa rovnako zúčastňovať na spolupráci, rozhodovaní a vedení Ústavu na všetkých úrovniach. Rodová rovnosť nie je len základným ľudským právom, ale aj základným pilierom pre mierové prosperujúce spoločenstvo a udržateľný rozvoj. Chápeme, že ženy majú rovnaké schopnosti ako muži, a teda obidve pohlavia majú mať prístup k rovnakým príležitostiam, zodpovednostiam a aktivitám a majú sa hodnotiť rovnako (rodová rovnosť). Na druhej strane si uvedomujeme, že ženy a muži sú rozdielni a že partikulárne schopnosti a vlastnosti žien by mali byť uznané za rovnako hodnotné ako partikulárne vlastnosti mužov (rodová rovnocennosť). To znamená spravodlivé zaobchádzanie so ženami a mužmi, ale aj zaobchádzanie, ktoré je síce rozdielne, ale zároveň je primerané z hľadiska práv, výhod, povinností a možností. Tieto dva koncepty sa navzájom dopĺňajú, avšak rozdielne správanie, aspirácie a potreby žien a mužov treba uznávať a podporovať rovnakým spôsobom.

5.3. Aktualizácia Akčného plánu organizácie v roku 2023

V rámci Akčného plánu sa ústav zameria na

1. Hľadanie konsenzu pre prípadnú integráciu ústavov do väčšieho celku.
2. Aktívne sa zapájať do programov SASPRO a IMPULZ s cieľom získať vysokokvalifikovaných výskumníkov doma i v zahraničí.
3. Akreditácia ďalšieho štúdiijného programu doktorandského štúdia.
4. Akvizícia doktorandov a postdoktorandov zo zahraničia v rámci európskych programov, ako aj v rámci poskytovania štipendií vlády SR pre zahraničných študentov
5. Priebežná aktualizácia webovej stránky ústavu v anglickom aj slovenskom jazyku.
6. Dokončiť prípravu kompaktných verzií výročných správ ústavu v anglickom jazyku.
7. Pokračovať v hľadaní riešení pre predaj licencií/patentov pod vedením ústavu
8. Propagácia výsledkov ústavu a špičkových zamestnancov na vedeckých, sociálnych sieťach.
9. Popularizácia výsledkov na internete.
10. Priebežná aktualizácia kritérií hodnotenia tvorivých zamestnancov v súlade s požiadavkami na výkonové financovanie vedeckých pracovísk SAV.
11. Hľadanie konsenzu pri zmene názvu ústavu – súčasný názov má domáce i medzinárodné renomé.

6. Spolupráca s univerzitami/vysokými školami a inými subjektmi v oblasti vedy a techniky, okrem aktivít uvedených v kap. 2, 3, 4

6.1. Spoločné pracoviská organizácie

6.1.1. Spolupráca s univerzitami/VŠ (fakultami)

Pozn.: uvádzajte len tie spolupráce, na ktoré má organizácia zmluvu resp. memorandum o zriadení spoločného pracoviska, resp. o vzájomnej spolupráci v konkrétnej oblasti výskumu

6.1.2. Spoločné pracoviská s inými organizáciami SAV

Pozn.: uvádzajte len tie spolupráce, na ktoré má organizácia zmluvu resp. memorandum o zriadení spoločného pracoviska, resp. o vzájomnej spolupráci v konkrétnej oblasti výskumu

6.2. Spoločné pracoviská organizácie s inými inštitúciami mimo SAV a VŠ

Pozn.: uvádzajte len tie spolupráce, na ktoré má organizácia zmluvu resp. memorandum o zriadení spoločného pracoviska, resp. o vzájomnej spolupráci v konkrétnej oblasti výskumu

6.3. Spoločné projekty s univerzitami a ostatnými inštitúciami mimo SAV

Názov projektu: Globálna charakterizácia svetelného znečistenia

Agentúra a číslo projektu: APVV-18-0014

Spolupracujúce inštitúcie: Fakulta matematiky, fyziky a informatiky UK

Koordinátor projektu: Miroslav Kocifaj

Obdobie riešenia: 1.7.2019-30.6.2023

Názov projektu: Difúzne svetlo v mestskom prostredí: nový model zohľadňujúci vlastnosti lokálnej atmosféry

Agentúra a číslo projektu: VEGA 2/0010/20

Spolupracujúce inštitúcie: Fakulta matematiky, fyziky a informatiky UK

Koordinátor projektu: Miroslav Kocifaj

Obdobie riešenia: 1.1.2020-31.12.2023

Názov projektu: Výskum priamej zložky dennej osvetlenosti v architektonickom a interiérovom prostredí

Agentúra a číslo projektu: VEGA 2/0017/20

Spolupracujúce inštitúcie: SvF TU Košice

Koordinátor projektu: Stanislav Darula

Obdobie riešenia: 1. 1. 2020 – 31. 12. 2022

Názov projektu: Štúdium degradácie viaczložkových cementových materiálov v dôsledku uhličitej korózie v podmienkach simulujúcich geotermálne vrty

Agentúra a číslo projektu: VEGA 2/0032/21

Spolupracujúce inštitúcie: FCHPT STU, Bratislava

Koordinátor projektu: Eva Kuzielová

Obdobie riešenia: 1. 1. 2021 – 31. 12. 2024

6.4. Iné typy spoločných aktivít s inštitúciami mimo SAV

7. Aplikácia výsledkov výskumu v spoločenskej a hospodárskej praxi

7.1. Výsledky výskumu organizácie aplikované v spoločenskej a hospodárskej praxi

7.2. Kontraktový – zmluvný výskum (vrátane zahraničných kontraktov)

Zadávatel' výskumného kontraktu: Technický a skúšobný ústav stavebný, n. o.

Názov/účel kontraktového výskumu: Ortuťová porozimetricia - pórová štruktúra mált

Dobu riešenia: 10/2022

Finančný prínos pre organizáciu: 700 eur

7.3. Iné formy aplikácie výsledkov výskumu v spoločenskej a hospodárskej praxi

8. Aktivity pre Národnú radu SR, vládu SR, ústredné orgány štátnej správy SR a iné organizácie

8.1. Členstvo v poradných zboroch vlády SR, Národnej rady SR, ministerstiev SR, orgánoch EÚ, EP, NATO a pod.

Tabuľka 8a Členstvo v poradných zboroch Národnej rady SR, vlády SR, ministerstiev SR, orgánoch EÚ, EP, NATO a pod.

Meno pracovníka	Názov orgánu	Funkcia

8.2. Expertízna činnosť a iné služby pre štátnu správu a samosprávy

8.3. Členstvo v radách štátnych programov a podprogramov ŠPVV a ŠO

Tabuľka 8b Členstvo v radách štátnych programov a podprogramov ŠPVV a ŠO

Meno pracovníka	Názov orgánu	Funkcia
------------------------	---------------------	----------------

8.4. Prehľad aktuálnych spoločenských problémov, ktoré riešilo pracovisko v spolupráci s Kanceláriou prezidenta SR, s vládnyimi a parlamentnými orgánmi alebo pre ich potrebu

9. Vedecko-organizačné a popularizačné aktivity

9.1. Vedecko-popularizačná činnosť

Tabuľka 9a Súhrnné počty vedecko-popularizačných činností organizácie SAV

Typ	Počet	Typ	Počet	Typ	Počet
prednášky/besedy	5	tlač	1	TV	0
rozhlas	1	internet	4	exkurzie	1
publikácie	0	multimediálne nosiče	0	dokumentárne filmy	0
iné	0				

9.2. Vedecko-organizačná činnosť

Tabuľka 9b Vedecko-organizačná činnosť

Názov podujatia	Domáca/ medzinárodná	Miesto	Dátum konania	Počet účastníkov
CESBP 2022 – Central European Symposium on Building Physics	medzinárodná	Bratislava, SR	5-7. 09. 2022	80
LPTMM 2023 – Light pollution: Theory, modeling and measurement	medzinárodná	Santiago de Compostela, Španielsko	21-24 6. 2022	50

9.3. Účasť na výstavách

9.4. Účasť v programových a organizačných výboroch národných konferencií

Tabuľka 9c Programové a organizačné výbory národných konferencií

Meno pracovníka	Programový	Organizačný	Programový i organizačný
Spolu			

9.5. Členstvo v redakčných radách časopisov

doc. Ing. Stanislav Darula, CSc.

Light and Engineering (funkcia: člen redakčnej rady)
 Lighting Research and Technology (funkcia: člen redakčnej rady)
 VTS News (funkcia: člen redakčnej rady)

Mgr. Olha Hrytsyna, DrSc.

Physico-Mathematical Modelling and Informational Technologies (Ukraine) (funkcia: členka redakčnej rady)

Mgr. Miroslav Kocifaj, DrSc.

Journal of Quantitative Spectroscopy and Radiative Transfer (funkcia: Guest editor)
 Remote Sensing (funkcia: Editor { Atmosphere & Urban remote sensing })

Prof.Dr.Ing. Martin-Tchingnabé Palou

Ceramics-Silikaty (funkcia: Editorial Board)
Journal of Thermal Analysis and Calorimetry (funkcia: Editorial Board)

Prof. Ing. Ján Sládek, DrSc.

Electronic Jour. Boundary Elements (funkcia: člen)
Jour. Computational and Applied Mechanics (funkcia: člen)
Journal of Multiscale Modelling (funkcia: člen)
SDHM-Structural Durability and Health Monitoring Journal (funkcia: člen)

Prof. RNDr. Vladimír Sládek, DrSc.

Communications in Numerical Analysis (funkcia: člen redakčnej rady)
Composites Part C (funkcia: člen redakčnej rady)
Int. Jour. Engineering Analysis with Boundary Elements (funkcia: Editor)
Journal of Industrial Mathematics and Computational Mechanics (funkcia: člen redakčnej rady)

9.6. Činnosť v domácich vedeckých spoločnostiach

doc. Ing. Miroslav Čekon, PhD.

Slovenská spoločnosť pre techniku prostredia (SSTP) (funkcia: člen odbornej sekcie OS 16
Simulácie potrieb energií v budovách)

doc. Ing. Stanislav Darula, CSc.

SNK CIE (funkcia: člen predsedníctva, vedecký tajomník)
SSTP - Slovenská spoločnosť pre techniku prostredia (funkcia: člen)
SSTS-Slovenská svetelnotechnická spoločnosť (funkcia: člen predsedníctva)
ZSVTS (funkcia: člen Rady)

Mgr. Miroslav Kocifaj, DrSc.

CIE Div5, TC 5-28 (funkcia: člen)
Slovenská astronomická spoločnosť (funkcia: člen)

Ing. Peter Matiašovský, CSc.

Slovenská bioklimatologická spoločnosť pri SAV (funkcia: člen)
Slovenská fyzikálna spoločnosť pri SAV (funkcia: člen)
Slovenská spoločnosť pre techniku prostredia (funkcia: člen)
Zväz slovenských vedeckotechnických spoločností (funkcia: Auditor EUR-ACE akreditačného
centra ZSVTS)

Prof.Dr.Ing. Martin-Tchingnabé Palou

13. Nadácie a fondy pri organizácii SAV

14. Informácie o aktivitách súvisiacich s uplatňovaním princípov rodovej rovnosti

14.1. Stručné hodnotenie stavu uplatňovania princípov rodovej rovnosti v organizácii, súvisiace aktivity a opatrenia, návrhy na aktualizáciu Plánu rodovej rovnosti SAV

V súlade s princípmi rodovej rovnosti a ustanoveniami Etického kódexu SAV nerobí vedenie ústavu žiadne rozdiely pri pracovnej náplni, kariérom raste, či odmeňovaní pracovníkov na základe rodového rozdielu. Zohľadňujú sa v plnej miere predpisy BOZP pri plnení pracovných povinností samostatne u žien a u mužov (napr. dvíhanie bremien).

Plán rodovej rovnosti je postavený na audite súčasného stavu zamestnancov a ich zaradenia podľa vybraných kvantitatívnych a kvalitatívnych ukazovateľov.

Rodová štruktúra pracovníkov ústavu je nasledovná:

- Vedúci oddelení: 50 % mužov a 50 % žien
- THS: 86 % žien a 14% mužov
- Oddelenie aplikovanej mechaniky: 87,5% mužov a 12,5 % žien
- Oddelenie optiky a termofyziky: 91 % mužov a 9% žien
- Oddelenie materiálov a konštrukcií: 66% mužov a 34% žien
- Vedenie Ústavu: 60% mužov a 40% žien
- Doktorandské štúdium: 25% mužov a 75% žien

Z hľadiska rodovej skladby je na ústave zamestnaných 29 mužov a 16 žien, z toho VŠ pracovníkov je 24 mužov a 9 žien. Z tvorivých pracovníkov je jedna žena s titulom DrSc., jedna v kvalifikačnom stupni IIa a tri interné doktorandky. Z hlavných riešiteľov projektov je iba jedna žena, čo súvisí aj s vekovým zložením pracovníkov ústavu, nakoľko veková kategória 40-60 rokov, ktorá je nositeľom ideí a hlavným žiadateľom o projekty, je na ústave slabo zastúpená.

14.2. Rodová skladba hlavných riešiteľov (vedúcich) projektov

Tabuľka 14a Rodová skladba hlavných riešiteľov domácich projektov

ŠTRUKTÚRA PROJEKTOV	Organizácia SAV je nositeľom projektu			Organizácia SAV je zmluvným partnerom		
	Počet	Hlavný riešiteľ		Počet	Hlavný riešiteľ za organizáciu

5. Iné projekty (FM EHP, Vedecko-technické projekty, na objednávku rezortov a pod.)	0	0	0	0	0	0

Tabuľka 14b Rodová skladba hlavných riešiteľov medzinárodných projektov

ŠTRUKTÚRA PROJEKTOV	Organizácia SAV je nositeľom projektu			Organizácia SAV je zmluvným partnerom		
	Počet	Hlavný riešiteľ		Počet	Hlavný riešiteľ za organizáciu	
		Muž	Žena		Muž	Žena
1. Projekty Horizont 2020 a Horizont Európa	0	0	0	0	0	0
2. Projekty ERA.NET, ESA, JRP	0	0	0	0	0	0
3. Projekty COST	0	0	0	0	0	0
4. Projekty EUREKA, NATO, UNESCO, CERN, IAEA, IVF, ERDF a iné	0	0	0	0	0	0
5. Projekty v rámci medzivládnych dohôd	0	0	0	0	0	0
6. Bilaterálne projekty MAD, Mobility, Open Mobility	0	0	0	0	0	0
7. Bilaterálne projekty ostatné	0	0	0	0	0	0
8. Podpora MVTS z národných zdrojov okrem SAV (APVV a iné)	0	0	0	0	0	0
9. SAS-UPJŠ ERC Visiting Fellowship Grants	0	0	0	0	0	0
10. Iné projekty	0	0	0	0	0	0

Stratégia rodovej rovnosti na roky sa zameria na týchto 4 strategických oblasti:

1. Opatrenia proti rodovo podmienenému šikanovaniu, násiliu a sexuálnemu obťažovaniu.
2. Usilovať sa o pomerné alebo vyvážené rodové zastúpenie na verejnom rozhodovaní (Vedecká rada, Správna rada a pod.)
3. Vytvoriť podmienky pre rovnováhu medzi pracovným a rodinným životom, vrátane podpory využívania jasiel' a materských škôl, športových štruktúr a športových podujatí, spoločenských aktivít.
4. Začlenenie partikulárnosti rodových vlastností do služieb Ústavu (popularizácie, výskumu a vyučovania).

14.3. Výskum zameraný na rodovú problematiku

Uveďte stručné, základné informácie o projektoch orientovaných na rodovú problematiku, ak organizácia takýto výskum realizuje. Informácie o financovaní a výsledkoch takýchto projektov sa nachádzajú v kapitole 2 a v prílohe C.

15. Iné významné činnosti organizácie SAV

16. Vyznamenania, ocenenia a ceny udelené pracovníkom organizácie v roku 2022

16.1. Domáce ocenenia

16.1.1. Ocenenia SAV

Prof. Ing. Ján Sládek, DrSc. : Laudácio - Významné osobnosti SAV 2022

16.1.2. Iné domáce ocenenia

16.2. Medzinárodné ocenenia

17. Poskytovanie informácií v súlade so zákonom č. 211/2000 Z. z. o slobodnom prístupe k informáciám v znení neskorších predpisov (Zákon o slobode informácií)

18. Problémy a podnety pre činnosť SAV

Správu o činnosti organizácie SAV spracoval(i): RNDr. Ladislav Kómar, PhD.

Vedecká rada ústavu schválila Správu o činnosti dňa 23.1.2021.

Riaditeľ organizácie SAV

Predseda vedeckej rady

Príloha B

Projekty riešené v organizácii

Medzinárodné projekty

Domáce projekty

Programy: VEGA

1.) Výskum priamej zložky dennej osvetlenosti v architektonickom a interiérovom prostredí *(Research of direct component of daylighting in architectural and interior environment)*

Zodpovedný riešiteľ: Stanislav Darula
Trvanie projektu: 1.1.2020 / 31.12.2022
Evidenčné číslo projektu: VEGA- 2/0017/20
Organizácia je koordinátorom projektu: áno
Koordinátor: Ústav stavebníctva a architektúry SAV, v. v. i.
Počet spoluriešiteľských inštitúcií: 0
Čerpané financie: VEGA SAV: 2182 €

Dosiahnuté výsledky:

BIZOŇOVÁ, Silvia - PONECHAL, Radoslav - DARULA, Stanislav - JURÁŠ, Peter.

Methods of preliminary estimation of total solar energy transmittance (TSET) on a sun protected window with climatic chamber and hot box apparatus. In Civil and Environmental Engineering, 2022, vol. 18, no. 1, p. 269-279. (2021: 0.268 - SJR, Q3 - SJR). ISSN 1336-5835. Dostupné na: <https://doi.org/10.2478/cee-2022-0025> (2/0017/20 : Výskum priamej zložky dennej osvetlenosti v architektonickom a interiérovom prostredí) Typ: ADNB

5.) Materiálové zloženie a vlastnosti samozhutiteľných ťažkých betónov (*Material composition and properties of Self-Compacting Heavyweight Concrete*)

Zodpovedný riešiteľ: Martin-Tchingnabé Palou
Trvanie projektu: 1.1.2021 / 31.12.2023
Evidenčné číslo projektu: VEGA 2/0017/21
Organizácia je koordinátorom projektu: áno
Koordinátor: Ústav stavebníctva a architektúry SAV, v. v. i.
Počet spoluriešiteľských inštitúcií: 0
Čerpané financie: VEGA SAV: 6981 €

Dosiahnuté výsledky:

Na základe predošlých výskumov v oblasti ťažkých betónov boli pripravené vzorky za použitia dvoch ťažkých kamenív s vysokou objemovou hmotnosťou, portlandského cementu a SCMs. Analýza chemického zloženia plniva aj spojiva bola realizovaná pomocou troch metód a to NAA, PGAA a XRF. Z výsledkov fyzikálno-mechanických vlastností vzoriek je zrejmé, že vzorky po 28 dňoch dosiahli triedu pevnosti betónu C55/67. Hodnoty objemovej hmotnosti betónu sa zisťovali v čerstvom aj v zatvrdnutom stave a značne presahujú 3000 kg m⁻³. Ostatné sledované vlastnosti preukazujú, že tieto betóny je možné označiť za vysoko-pevnostné ťažké betóny. Rovnako použité materiály preukázali dobré aktivačné vlastnosti.

11.) Zlepšenie štruktúrálnej bezpečnosti a energetickej účinnosti prostredníctvom vývoja trvalo udržateľných cementových kompozitov na báze cementu odolných voči extrémnym teplotám s funkciami samoopravenia po požiaroch (*Improving Structural Safety and Energy Efficiency Through Development of Extreme Temperature Resistant Sustainable Cement-Based Composites with Post-Fire Self-Healing Features*)

Zodpovedný riešiteľ: Ajitanshu Vedrtnam
Trvanie projektu: 1.9.2022 / 31.8.2025
Evidenčné číslo projektu: 1213/02/01
Organizácia je koordinátorom projektu: áno
Koordinátor: Ústav stavebníctva a architektúry SAV, v. v. i.
Počet spoluriešiteľských inštitúcií: 0
Čerpané financie: SAV: 11846 €
EU: 10960 €

Dosiahnuté výsledky:

Za posledné štyri mesiace realizácie projektu sme dosiahli pokrok v nasledujúcich cieľoch projektu:

1. Vývoj numerického modelu založeného na konečných prvkoch na predpovedanie časových a teplotných zmien, únosnosti, tepelného a zvyškového napätia v CBC.
- 2, Dosiahnutie regenerácie CBC po požari vývojom tepelne riadených zapuzdrení pre baktérie používané v samoopravnom betóne.
- 3, Stanovenie únosnosti pred požiarom, počas neho a po ňom a zvyškového výkonu CBC počas zahrievaného stavu a žihaného stavu po požari a stanovenie vzťahu príčina-účinok pomocou deštruktívneho, ultrazvukového testovania a mikroskopickej charakterizácie.

Ako výstup bude v roku 2023 publikovaná práca

Chaturvedi, S.; Vedrtnam, A.; Youssef, M.A.; Palou, M.T.; Barluenga, G.; Kalauni, K. Fire-Resistance Testing Procedures for Construction Elements—A Review. *Fire* **2023**, *6*, 5. <https://doi.org/10.3390/fire6010005>.

12.) Meranie and modelovanie svetelného znečistenia (*Measuring and Modelling Light Pollution*)

Zodpovedný riešiteľ: Stefan Wallner
Trvanie projektu: 1.9.2022 / 31.8.2025
Evidenčné číslo projektu: 1384/03/01
Organizácia je koordinátorom projektu: áno
Koordinátor: Ústav stavebníctva a architektúry SAV, v. v. i.
Počet spoluriešiteľských inštitúcií: 0
Čerpané financie: SAV: 11784 €
EU: 10960 €

Dosiahnuté výsledky:

V prvých štyroch mesiacoch tohto projektu bola ukončená najmä administratívna príprava na úspešné naplnenie všetkých cieľov projektu. Boli predložené dva články, jeden z nich vo vysoko impaktovanom časopise *Nature Astronomy*.

V recenznom konaní sú dve publikácie:

Wallner S, Kocifaj M. Aerosol impact on light pollution in cities and their environment. *Journal of Environmental Management* (požadovaná menšia revízia, zverejnenie sa očakáva začiatkom roka 2023)

Kocifaj M, Kómar L, Lamphar H, Barentine J, Wallner S. A systematic light pollution modeling bias in present night sky brightness predictions. *Nature Astronomy* (predložená revízia, zverejnenie sa očakáva v roku 2023)

Účasť na workshope o využívaní služieb ECMWF Copernicus Climate Change (C3S) and Atmosphere Monitoring (CAMS) Services v septembri 2022.

V súčasnosti sa pripravujú ďalšie tri publikácie.

Príloha D

Údaje o pedagogickej činnosti organizácie

Semestrálne prednášky:

doc. Ing. Miroslav Čekon, PhD.

Názov semestr. predmetu: Progresívne materiály a technológie budov

Počet hodín za semester: 18

Názov katedry a vysokej školy: Slovenská technická univerzita v Bratislave, Katedra materialového inžinierstva a fyziky

doc. Ing. Miroslav Čekon, PhD.

Názov semestr. predmetu: Stavebná tepelná technika

Počet hodín za semester: 8

Názov katedry a vysokej školy: Slovenská technická univerzita v Bratislave, Katedra materialového inžinierstva a fyziky

Ing. Jakub Čurpek, PhD.

Názov semestr. predmetu: Progresívne materiály a technológie budov

Počet hodín za semester: 6

Názov katedry a vysokej školy: Stavebná fakulta STU, Katedra materiálového inžinierstva a fyziky

Ing. Jakub Čurpek, PhD.

Názov semestr. predmetu: Stavebná tepelná technika

Počet hodín za semester: 8

Názov katedry a vysokej školy: Stavebná fakulta STU, Katedra materiálového inžinierstva a fyziky

doc. Ing. Stanislav Darula, CSc.

Názov semestr. predmetu: Building Physics - Daylighting

Počet hodín za semester: 8

Názov katedry a vysokej školy: Slovenská technická univerzita v Bratislave, Katedra konštrukcií pozemných stavieb

Ing. Peter Matiašovský, CSc.

Názov semestr. predmetu: Metodológia vedeckého experimentu

Počet hodín za semester: 4

Názov katedry a vysokej školy: Stavebná fakulta STU, Katedra konštrukcií pozemných stavieb

Prof.Dr.Ing. Martin-Tchingnabé Palou

Názov semestr. predmetu: Building Materials

Počet hodín za semester: 24

Názov katedry a vysokej školy: Stavebná fakulta STU, Katedra materiálového inžinierstva a fyziky

Prof.Dr.Ing. Martin-Tchingnabé Palou

Názov semestr. predmetu: Chémia stavebných materiálov

Počet hodín za semester: 24

Názov katedry a vysokej školy: Stavebná fakulta STU, Katedra materiálového inžinierstva a fyziky

Prof.Dr.Ing. Martin-Tchingnabé Palou

Názov semestr. predmetu: Maltoviny

Počet hodín za semester: 24

Názov katedry a vysokej školy: Stavebná fakulta STU, Katedra materiálového inžinierstva a fyziky

Prof.Dr.Ing. Martin-Tchingnabé Palou

Názov semestr. predmetu: Priemyselná anorganická chémia

Počet hodín za semester: 24

Názov katedry a vysokej školy: Fakulta chemickej a potravinárskej technológie STU, Ústav anorganickej chémie, technológie a materiálov

Prof.Dr.Ing. Martin-Tchingnabé Palou

Názov semestr. predmetu: Špeciálna technológia anaorganických materiálov

Počet hodín za semester: 24

Názov katedry a vysokej školy: Fakulta chemickej a potravinárskej technológie STU, Ústav anorganickej chémie, technológie a materiálov

Ing. Richard Slávik, PhD.

Názov semestr. predmetu: Building Physics

Počet hodín za semester: 26

Názov katedry a vysokej školy: Mendelova univerzita, Brno, Česká republika, Ústav nauky o drevě a

dřevarašských technologii

Ing. Richard Slávik, PhD.

Název semestr. predmetu: Energetické vlastnosti budov

Počet hodin za semester: 26

Název katedry a vysokej školy: Mendelova univerzita, Brno, Česká republika, Ústav nauky o dřevě a dřevařských technologii

Ing. Richard Slávik, PhD.

Název semestr. predmetu: Navrhování dřevěných prvků a konstrukcí

Počet hodin za semester: 26

Název katedry a vysokej školy: Mendelova univerzita, Brno, Česká republika, Ústav nauky o dřevě a dřevařských technologii

Dr. Stefan Wallner, BSc MSc

Název semestr. predmetu: Science communication in Astronomy

Počet hodin za semester: 28

Název katedry a vysokej školy: University of Vienna, Austria, Department of Astrophysics

Semestrálne cvičenia:

doc. Ing. Miroslav Čekon, PhD.

Název semestr. predmetu: Progresívne materiály a technologie budov

Počet hodin za semester: 12

Název katedry a vysokej školy: Slovenská technická univerzita v Bratislave, Katedra materialového inžinierstva a fyziky

doc. Ing. Miroslav Čekon, PhD.

Název semestr. predmetu: Stavebná tepelná technika

Počet hodin za semester: 20

Název katedry a vysokej školy: Slovenská technická univerzita v Bratislave, Katedra materialového inžinierstva a fyziky

Ing. Jakub Čurpek, PhD.

Název semestr. predmetu: Ateliérová tvorba

Počet hodin za semester: 26

Název katedry a vysokej školy: Stavebná fakulta STU, Katedra materiálového inžinierstva a fyziky

Ing. Jakub Čurpek, PhD.

Název semestr. predmetu: Progresívne materiály a technologie budov

Počet hodin za semester: 13

Název katedry a vysokej školy: Stavebná fakulta STU, Katedra materiálového inžinierstva a fyziky

Ing. Jakub Čurpek, PhD.

Název semestr. predmetu: Stavebná tepelná technika

Počet hodin za semester: 26

Název katedry a vysokej školy: Stavebná fakulta STU, Katedra materiálového inžinierstva a fyziky

Ing. Richard Slávik, PhD.

Název semestr. predmetu: Energetické vlastnosti budov

Počet hodin za semester: 26
